19th February 2023

Dear Kinesis Community,

We are pleased to present to you the results of our latest independent audit and holdings verification.

On the 16th of January 2023 the Allocated Bullion Exchange produced an inventory report of all metal attributed to Kinesis Cayman. This report was presented to Inspectorate International to conduct an independent audit, which was undertaken over the 17th, 18th, and 19th January 2023.

At the time the inventory reports were generated, Kinesis currencies in circulation were as follows (verifiable on the Kinesis blockchain):

KAU: 1,168,246.607 (as at 10:18:18UTC Mon, 16 Jan 2023)

KAG: 2,820,714.286 (as at 10:18:19UTC Mon, 16 Jan 2023)

The independent audit confirmed the following metal quantities held by Kinesis Cayman as at Monday, 16th January 2023:

Gold (9999 fine equivalent): 1,168,246.607g

Silver (999 fine equivalent): 2,820,714.395ozt

We would like to thank all members of the Kinesis community for your ongoing support.

Kind Regards,

Thomas Coughlin
CEO, Kinesis Money

19th February 2023

To whom it may concern.

On Monday 16th January 2023, the Allocated Bullion Exchange (ABX) produced an inventory report of the precious metals attributed to Kinesis Cayman for the purpose of independent audit. This inventory report was given to Inspectorate International, a Bureau Veritas company who conducted this independent audit across the respective ABX vaulting locations from 17th January – 19th January 2023.

The findings of the independent audit concluded the inventory report of the Kinesis Cayman holdings and the physical precious metals holdings across the ABX vaulting locations all reconcile.

Kind Regards,

Thomas Coughlin
CEO, Allocated Bullion Exchange

Summary of Inventory

Total items for Gold : 35
Total items for Silver : 1036
Total Quantity : 1071

4. PHYSICAL AUDIT:

The total quantity of bullion items held in customer vault storage for each product type was counted and compared with the total quantity of bullion items for the respective product types as outlined in the vaulting provider's inventory report.

The total quantity of bullion items held in customer vault storage for each product type was counted and compared with the total quantity of bullion items for the respective product types when compared to ABX's Vault Management System.

The physical count, vaulting provider's inventory report and ABX's Vault Management System were found to record identical inventory counts.

5. DETAILS OF PACKAGING:

All customers owned bullion items were made available for the audit and inspection. All bullion bars were made readily accessible for the physical count.

6. VERIFICATION OF SERIAL NUMBERED BARS:

All the serialised customer holdings were further inspected to verify the accuracy and correctness of the listed serial numbers in ABX's Vault Management System.

7. WEIGHMENT:

A random sample of the holdings equating to a minimum of 2.5% were weighed during the inspection to verify the accuracy and correctness of the weights of the metal and records of ABX's Vault Management System. A certified Sartorius weighing scale (serial number: GBB14202S-OCE, serial number 28902031) was used for the purpose of weight verification. Certificate of the scale is valid till June 2023.

Certified calibration weights were used to conduct an accuracy check before the weighing was initiated.

Constantine Papaioannou conclude that the information provided to it being the vaulting provider's inventory report, ABX's Vault Management System and physical holdings audited on the February 3, 2023, all reconcile,

10. AUDITOR COMMENTS:

- a. Old seal number [REDACTED] new seal [REDACTED] - The missing Switzerland 20 Franc 1927 coin from the previous audit was found and the value was converted from grams to troy Ozs and added to the new Au total weight. It is my opinion that the coin was wedged in the flap of the cardboard box and was not visible, because on January 18, I counted the whole lot twice (323 pieces) and three times the said coins, the result was one (1) missing coin. If it was counted in with another lot, the total number of coins would have been 324 pieces.
- b. Please correct New seal # [REDACTED] (old seal (Jan 18) [REDACTED]) to read: British Sovereign 1899 Six (6) coins not Eleven (11) and entered 1909 Five (5) coins.
- c. No bars were weighed as the scale provided was not calibrated and according to Marca-Amit the variance would be 200-300 grams off.
- d. With the exception of 2 seals all other seals were broken and replaced with new seals (see Seal list attached), the items in the unbroken seals were easily and clearly checked and identified without breaking the seals.
- e. All bars and coins were 100% individually checked. See attached lists.

We hereby report that the above inspection is based on our findings/observations at the time and place indicated above only and does not refer to any other matters.

Summary of Inventory

Total items for Gold	:	17
Total items for Silver	:	304
Total Quantity	:	321

4. PHYSICAL AUDIT:

The total quantity of bullion items held in customer vault storage for each product type was counted and compared with the total quantity of bullion items for the respective product types as outlined in the vaulting provider's inventory report.

The total quantity of bullion items held in customer vault storage for each product type was counted and compared with the total quantity of bullion items for the respective product types when compared to ABX's Vault Management System.

The physical count, vaulting provider's inventory report and ABX's Vault Management System were found to record identical inventory counts.

5. DETAILS OF PACKAGING:

All customers owned bullion items were made available for the audit and inspection. All bullion bars were made readily accessible for the physical count.

6. VERIFICATION OF SERIAL NUMBERED BARS:

All the serialised customer holdings were further inspected to verify the accuracy and correctness of the listed serial numbers in ABX's Vault Management System.

The serial numbers for the bullion bars listed below were inspected and verified against the serial numbers of the physical bars in the vault.

7. WEIGHMENT:

A random sample of the holdings equating to a minimum of 2.5% were weighed during the inspection to verify the accuracy and correctness of the weights of the metal and records of ABX's Vault Management System. A certified Mettler Toledo weighing scale (model number: BBA211-5CA300-1001, serial number B438034487) was used for the purpose of weight verification. The weighing scale was last calibrated on 23rd February 2022.

Certified calibration weights were used to conduct an accuracy check before the weighing was initiated. The scale showed no deviation when 1 kg and 3 kg calibration weights were used for accuracy control.

AUDIT REPORT

Audited by : Inspectorate (Singapore) Pte Ltd
Issued to : Allocated Bullion Exchange Ltd (ABX)
Commodities : Gold and Silver Bars
Vault Storage Provider : Loomis International (SG) Pte Ltd

This is to report that, on the request of Messrs. Bureau Veritas Commodities UK Ltd on behalf of Allocated Bullion Exchange Ltd (ABX), we attended at the below mentioned premises on 18 January 2023 for the purpose of carrying out a stock inventory audit of the above-mentioned Gold and Silver Bullion for Kinesis Cayman. We report as follows:-

1. PLACE OF INTERVENTION:

Loomis International (SG) Pte Ltd

2. PERSONS IN ATTENDANCE:

3. FACTS AND OBSERVATIONS:

- The Gold and Silver bars were satisfactorily stored in a secure vault;
- Identification of the auditor and all personal belongings were checked by the onsite security team prior to entry;
- The auditor was accompanied by two vault employees at all times for security purposes;
- The holdings were kept segregated from other account holdings within the vault;
- The holdings were stored in sealed plastic bags & boxes.

The total aggregated quantity of customer owned bullion for each product category was counted in accordance with the below breakdown:-

Holding Description – Gold	Quantity

Summary of Inventory

Total items for Gold : 38
Total items for Silver : 765
Total Quantity : 803

4. PHYSICAL AUDIT:

The total quantity of bullion items held in customer vault storage for each product type was counted and compared with the total quantity of bullion items for the respective product types as outlined in the vaulting provider's inventory report.

The total quantity of bullion items held in customer vault storage for each product type was counted and compared with the total quantity of bullion items for the respective product types when compared to ABX's Vault Management System.

The physical count, vaulting provider's inventory report and ABX's Vault Management System were found to record identical inventory counts.

5. DETAILS OF PACKAGING:

All customers owned bullion items were made available for the audit and inspection. All bullion bars were made readily accessible for the physical count.

6. VERIFICATION OF SERIAL NUMBERED BARS:

All the serialised customer holdings were further inspected to verify the accuracy and correctness of the listed serial numbers in ABX's Vault Management System.

The serial numbers for the bullion bars listed below were inspected and verified against the serial numbers of the physical bars in the vault.

7. WEIGHMENT:

A random sample of the holdings equating to a minimum of 2.5% were weighed during the inspection to verify the accuracy and correctness of the weights of the metal and records of ABX's Vault Management System. A certified Precisa Floor weighing scale (model number: IBK 40,000G, serial number 5902127) was used for the purpose of weight verification. The weighing scale was last calibrated on 24th May 2022.

Certified calibration weights were used to conduct an accuracy check before the weighing was initiated. The scale showed no deviation when 1 kg and 3 kg calibration weights were used for accuracy control.

7. WEIGHMENT:

A random sample of the holdings equating to a minimum of 2.5% were weighed during the inspection to verify the accuracy and correctness of the weights of the metal and records of the attached reference item's list dated 19.01.2023. A certified "Pircisa" weighing scale (serial number: 5920069, calibration number/date: 2300092 12.01.2023) and "Ohaus" weighing scale (serial number: C232605137, calibration number/date: 22106078 06.12.2022) were used for the purpose of weight verification.

Certified calibration weights were used to conduct an accuracy check before the weighing was initiated. The scale showed no deviation when 1 kg standard weights were used for accuracy control. Reference weights have no calibration certificate. Since calibration certificate of the standard weight was not available, validation was performed on two existing scales using reference weights. No significant difference was observed between the weighing results

7. WEIGHMENT:

A random sample of the holdings equating to a minimum of 2.5% were weighed during the inspection to verify the accuracy and correctness of the weights of the metal and records of ABX's Vault Management System. A certified Sartorius weighing scale (serial number: GBB14202S, serial number 29302419) was used for the purpose of weight verification. The weighing scale was last calibrated on May 13, 2022.

Certified calibration weights were used to conduct an accuracy check before the weighing was initiated. The scale showed no deviation when 1 kg and 1000 kg calibration weights were used for accuracy control.

9. CONCLUSIONS & ANOMALIES:

██████████ conclude that the information provided to it being the vaulting provider's inventory report, ABX's Vault Management System and physical holdings audited on the January 17, 2023, all reconcile.

We hereby report that the above inspection is based on our findings/observations at the time and place indicated above only and does not refer to any other matters.

This inspection has been carried out to the best of our knowledge, conscience and ability and our finding does in no way relieve concerned parties from their contractual liabilities.
