

White Paper: Gold (KAU) Kinesis Minting Programme

Version 1.1

Executive Summary

Kinesis is an innovative financial platform that combines the stability of fully allocated gold and silver with the transformative potential of blockchain technology. The platform empowers participants to trade, spend and mint gold-backed digital assets, while unlocking consistent income through a unique fee-sharing model and innovative reward mechanisms.

The Kinesis Minting Programme

The **Kinesis Minting Programme (KMP)** enables users to mint gold-backed digital assets (KAU), earn consistent yields, and contribute to a sustainable monetary ecosystem. Through **rewards of 2 basis points** and **refunded minting fees, settled weekly**, participants can benefit from a cost-offsetting mechanism, with the potential for consistent rewards during normal market conditions. The system is designed to encourage engagement and long-term participation in the Kinesis ecosystem. This dual benefit increases earning potential and empowers users to leverage the system for long-term growth and stability.

The Minting Process

Kinesis makes minting straightforward and accessible:

- **Simple Conversion:** Mint KAU by converting USD currency. Minted assets are securely stored and ready for trading, spending, or reinvestment.
- **Mint Cycling:** Participants can increase rewards through a structured cycle of minting, trading, and reinvesting. Transparent fee structures and refund mechanisms further optimise the process.

Key Features and Benefits

1. **Gold-Backed Stability:** Each KAU is backed by 1 gram of allocated physical gold, providing intrinsic value and a hedge against market volatility.
2. **Reward Opportunities:**
 - **Rewards: 0.02% bonus** on each mint cycle, based on static pricing in normal market conditions, settled weekly.
 - **Monthly Yields:**
 - Minter's Yield (5%) for minting and transacting KAU.
 - Velocity Yield (10%) for transacting within the ecosystem.
 - Holder's Yield (15%) for storing KAU.

3. **Minting Costs:** Minting fees and standard static price spreads are refunded weekly, ensuring cost-efficiency.
4. **Ecosystem Expansion:** Minting drives liquidity and adoption, benefitting all participants, including KVT holders.

Revenue Sharing Model

A defining feature of the Kinesis ecosystem is its innovative fee-sharing model, which redistributes all transaction-generated revenues back to participants. Fees are collected from various activities, including:

- **Minting:** Creation of new KAU and KAG digital assets.
- **Spending:** Utilising digital assets via the Kinesis Debit Card or payment services.
- **Trading & Transfers:** Transactions on the Kinesis Pro exchange.
- **Sending** KAU and KAG digital assets.

Each month, a portion of global transaction fees are distributed to Kinesis users as yields, offering consistent rewards. The figure below indicates the percentage share of the yield pool distributed among Kinesis users rewarding each interaction with the system.

- **Minter's Yield (5%):** Recurring rewards for minting KAU/KAG.
- **Velocity Yield (10%):** Incentives for active transacting within the ecosystem.
- **Holder's Yield (15%):** Rewards for storing gold- and silver-backed currencies.
- **Kinesis Velocity Tokens (KVTs):** Exclusive access to 20% of global transaction fees, **capped at 300,000 tokens**.

The Minter's Yield and Velocity Yield are distributed proportionally based on transactional activity. Users who engage in high-volume minting and trading, such as through Mint Cycling, will receive a corresponding share of the yield payouts. Similarly, KAU holders with a significant share of the system's gold, relative to the overall market cap, will be entitled to a proportionally larger share of the Holder's Yield.

Vision

Kinesis envisions a global, real-asset-backed financial system that champions sound money principles and empowers individuals to preserve and grow wealth. By integrating the stability of gold with blockchain innovation, Kinesis delivers a secure, transparent, and rewarding financial platform for individuals and institutions.

The KMP transforms financial participation, providing a sustainable pathway for wealth preservation and growth. Join Kinesis today and participate in the future of sound money.

Introduction

Kinesis Minting Programme explained

In the Kinesis ecosystem, minting is the process of creating and introducing new digital currency backed by physical gold into circulation. When participants mint gold KAU digital assets, they generate assets fully backed by allocated physical gold, with each KAU is directly redeemable for gold securely titled in the minter's name.

KAU, a digital asset backed by 1 gram of fully allocated physical gold bullion, is securely held in audited vaults. Fully redeemable for the underlying gold, KAU combines the intrinsic value of gold with the efficiency of blockchain, offering participants a stable, transparent, and rewarding financial system.

To initiate the minting process, participants can convert USD into KAU. Once minted, these gold-backed digital assets are issued onto the blockchain via the Kinesis platform, entering circulation as stable, secure digital assets.

Benefits of Minting KAU

Minting KAU provides significant benefits, combining financial rewards, stability, and ecosystem growth:

- **Bonus Rewards:** Earn a 0.02% bonus on every mint cycle, credited in KAU*.
- **Fee Reimbursement:** Minting fees are fully refunded weekly.
- **Minter's Yield (5%):** Lifetime monthly rewards tied to global transaction activity.
- **Velocity Yield (10%):** Rewards for transacting and spending in the ecosystem.
- **Holder's Yield (15%):** Long-term rewards for securely storing KAU.
- **Gold-Backed Stability:** Each KAU is backed by 1 gram of allocated physical gold, providing intrinsic value and protection against market volatility.
- **Increases KVT Value:** Minting drives transactional volume across the Kinesis ecosystem, increasing the proportional revenue share distributed to KVT holders and enhancing their returns.
- **Ecosystem Development:** Expands liquidity and adoption, driving the growth and sustainability of the Kinesis monetary system.

***In a flat market, where a mint cycle is conducted without market movement with sufficient market liquidity, the standard cost is 0.90%. As part of the KMP,*

participants will receive a refund of minting costs (0.90%) along with an additional 0.02% reward, resulting in a net benefit of approximately 2 basis points, less the \$5 fixed withdrawal fee. Returns are calculated based on prevailing fees and spreads and are subject to market fluctuations.

Core Purpose and Vision

- **Empower individuals and institutions** to generate consistent income.
- **Foster a sustainable, community-driven framework** that reinvests a significant portion of system success back into its participants.
- **Drive the growth of a global, asset-backed ecosystem** that rewards users and promotes the adoption of sound money principles.

The Mint Cycling Process: Key Steps

[Minting KAU](#) on the Kinesis platform has been designed to be a straightforward and rewarding process. By following these steps, participants can increase their earnings and actively contribute to the growth of the Kinesis ecosystem:

1. Fund Your Account

- Deposit fiat currency into your verified Kinesis Mint account or;
- Deposit your USD directly into the [Kinesis Platform](#), which can be instantly transferred to the Mint.

2. Mint KAU

- Convert USD into **KAU** using the Kinesis Mint platform.
- Instantly receive your gold-backed digital assets, securely stored and ready for use.

3. Sell Your KAU

- Sell your minted KAU on the Kinesis Pro exchange at the prevailing market price for USD.
- Use the Kinesis Pro exchange to trade or transfer USD instantly for seamless liquidity and accessibility.

4. Earn Rewards

- Transfer your minted KAU to the KMS to start earning **KAU rewards**.
- Recover your minting fees automatically through mint cycling, settled weekly.

6. Unlock Monthly Rewards

- Access **Minter's Yield**, **Velocity Yield**, and **Holder's Yield** to earn additional rewards.

7. Transfer to the mint USD - and repeat the minting process

- Transfer USD back into your Mint account, with only a \$5 withdrawal fee.

Repeat Mint Cycling Steps

Mint cycling within the KMS is an efficient process:

1. **Minting:** Participants create new Kinesis KAU (gold-backed digital assets) at the current mint price, calculated based on the gold spot price plus a small premium (spread).
2. **Transferring:** The minted KAU is transferred to the Kinesis Pro exchange.
3. **Selling:** The KAU is sold on the exchange at the prevailing market price for USD.

Rewards

The Mint Cycling process is a simple, transparent, and rewarding system that allows participants to unlock the full potential of the Kinesis ecosystem. By following these steps, users can:

- Mint gold-backed KAU.
- Earn rewards while recovering minting fees at the end of each week.
- Access monthly yields: Minter's Yield, Holder's Yield, Velocity Yield.
- Participate in monthly yield pools for additional income.
- Reinvest and repeat the cycle to optimise long-term returns.

While the 0.02% bonus provides an additional incentive, it is the Velocity Yield that offers the most significant financial reward to participants. The Velocity yield shares 10% of all Kinesis global transaction revenue proportionally among traders and spenders driving long-term profitability for active users.

This streamlined process ensures users benefit from a self-sustaining, efficient financial system that combines gold's stability with blockchain innovation. It is designed to foster long-term participation, liquidity, and consistent growth in the Kinesis ecosystem.

Execution Fees

The process involves a total fee structure of 90 basis points (bps) plus a \$5 withdrawal fee, broken down as follows:

1. **Mint Fee** (0.45%): Charged at the time of minting.
2. **Mint Spread** (0.23%): Represents the difference between the buy (BID) price and the sell (ASK) price.

3. **Exchange Fee** (0.22%): Applied during the sale of KAU into USD (KAU/USD) on the exchange.
4. **Fixed Withdrawal Fee**: \$5, incurred when transferring USD out of the Kinesis exchange and back to the Mint.

Total Cost Structure:

- Percentage-based fees: 90 bps (0.90%).
- Fixed withdrawal fee: \$5.
- Fees are transparent and calculated in real-time, allowing participants to assess profitability during each cycle.

This structure forms the foundation of mint cycling and determines potential profits, break-even points, and losses based on market conditions.

Market Risks and Volatility

While Kinesis aims to refund minting costs and provide a typical net benefit of 2 basis points per mint cycle, these rewards are contingent on prevailing market conditions. Market volatility, liquidity changes, or disruptions in market-maker operations may affect these outcomes. Participants are encouraged to assess the associated risks and understand that returns are not guaranteed.

Minimum Profit and Loss Scenarios

This analysis provides a detailed overview of a **\$100,000 Kinesis Mint trading cycle example**, highlighting how small price movements influence profitability. By factoring in mint fees, refunds, bonuses, and exchange costs, it delivers a clear roadmap for managing narrow margins and increasing trading efficiency.

Example 1.1

Key Mechanics

- **Automated Refunds and Bonuses:** All refunds and bonuses are processed automatically and credited to your account at the end of each week, ensuring effortless and transparent settlement.
- **Profit and Loss Calculation:** Profit or loss is calculated by comparing the mint price to the sell price, with all associated costs, refunds, and bonuses..

Minimum Profit Example

The following example demonstrates the expected outcomes during stable market conditions. It assumes a mint cycle with a typical cost structure of 0.90% and a 0.02% reward.

- Mint Price: **\$87.5972** (KAU price, equal to 1 gram of spot physical gold)
- Sell Price: **\$87.5841**
- Price Spread: **\$0.0131**

Transaction Details

- KAU Units: **1141.5890**
- Investment Amount: **\$100,000.00**
- Sell Value: **\$99,985.05**
- Price Impact: **-\$14.95**

Costs Breakdown

- Mint Fee (45 bps): **\$450.00**
- Mint Spread (23 bps): **\$230.00**
- Exchange Fee (22 bps): **\$220.00**
- Withdrawal Fee: **\$5.00**
- Total Costs: **\$905.00**

Rewards

- Minting Cost Rebate (90 bps): **\$900.00**
- Minting Bonus (2 bps): **\$20.00**

Final Summary

- Initial Investment: **\$100,000.00**
- Value When Sold: **\$99,985.05**
- Price Impact: **-\$14.95**
- Total Fees: **-\$905.00**
- Total Rewards: **+\$920.00**
- Total = **\$0.05**

Loss Example

- Mint Price: **\$87.5972**
- Sell Price: **\$87.5840**
- Price Spread: **\$0.0132**

Transaction Details

- KAU Units: **1141.5890**
- Investment Amount: **\$100,000.00**
- Sell Value: **\$99,984.93**
- Price Impact: **-\$15.07**

Costs Breakdown

- Mint Fee (45 bps): **\$450.00**
- Mint Spread (23 bps): **\$230.00**

- Exchange Fee (22 bps): **\$220.00**
- Withdrawal Fee: **\$5.00**
- Total Costs: **\$905.00**

Rewards

- Minting Cost Rebate (90 bps): **\$900.00**
- Extra Bonus (2 bps): **\$20.00**

Final Summary

- Initial Investment: **\$100,000.00**
- Value When Sold: **\$99,984.93**
- Price Impact: **-\$15.07**
- Total Fees: **-\$905.00**
- Total Rewards: **+\$920.00**
- Total: **-\$0.07**

These scenarios are illustrative and assume stable market conditions. In volatile markets or during operational changes, costs and rewards may differ, and profitability is not guaranteed.

To increase the potential of this system, consider its impact over multiple cycles. For example, by repeating the cycle 50 times, traders can accumulate exponential benefits, compounding refunds and bonuses to generate substantial returns over time. This scalability highlights the system's ability to deliver both reliability and long-term financial growth. By leveraging its refund and bonus mechanisms, participants can achieve consistent profitability, even in challenging scenarios. When market conditions are favourable, the system allows for considerable returns, making it an ideal solution for both conservative and growth-oriented traders.

Minter's Yield

Passive Income from Minting:

Minter's Yield provides ongoing rewards to participants who mint KAU. Once assets are minted, users begin earning a proportional share of the **5% global fee pool**, each month.

Ongoing Rewards:

- Minter's Yield ensures recurring income based on the volume of assets minted. Minter's yield volume remains for the life of your account and is paid in perpetuity every month.

The Power of the Minter's Yield:

- Rewards are distributed monthly, allowing participants to see immediate benefits.
- As the system grows, the value of this yield increases with rising transaction volumes.

Yield Potential: A Wealth Engine 15% Global Fee Pool:

- Participants can tap into both Minter's Yield (5%) and Velocity Yield (10%), earning substantial rewards from their participation.
- These yields are calculated daily and distributed monthly, creating consistent and compounding income streams.

How is the Kinesis Minting Programme sustainable?

The Kinesis is uniquely positioned to deliver profitability, security, and sustainability due to its robust infrastructure, strategic industry alignment, and user-focused reinvestment model. Below are the key elements that make this system possible:

Complete Ownership of Technology and Gold

- **Integrated Control:** Kinesis fully owns its technology stack, minting platform, and gold operations.
- **Operational Efficiency:** This vertical integration ensures full control over processes, reducing third-party dependencies and enabling seamless, cost-effective operations.

Strategic Partnerships and Market-Maker Capabilities

- **Industry Leadership:** Kinesis leverages strong relationships with gold industry leaders to ensure competitive pricing and robust liquidity.
- **Market-Making Power:** Acting as both a market participant and facilitator, Kinesis ensures smooth asset flows, stable pricing, and a thriving ecosystem for participants.
- **Global Integration:** Partnerships across financial and precious metals markets enable Kinesis to seamlessly connect traditional assets with blockchain-based digital assets.

Why are we doing it?

Revenue Reinvestment to Stimulate the Ecosystem

- **Fee Pool Participation:** All transaction fees are accumulated in the fee pool where they are reinvested through Minter's Yield, Velocity Yield, and other bonuses. Kinesis itself also participates as a stakeholder in the fee pool, ensuring a shared commitment to the system's success.
- **A Self-Sustaining Ecosystem:** This reinvestment model creates a continuous cycle of engagement and rewards, driving user participation, liquidity, and market attention. The more activity within the system, the more participants and the ecosystem as a whole benefit, fostering organic growth and scalability.
- **An Equitable Framework:** By actively participating in the same fee pool as its users, Kinesis ensures aligned incentives, where the success of the system directly translates to shared rewards. This approach creates a truly equitable and collaborative financial system, where growth is collective, and sustainability is prioritised.

Through its integrated infrastructure, industry relationships, and commitment to reinvestment, Kinesis has created a sustainable financial system that benefits all participants. . This makes Kinesis a uniquely positioned leader in the sound money movement and this program aims to illustrate the true potential of that system.

Entry Qualification Criteria to the Kinesis Minting Programme

Participation in the **Kinesis platform** is not only a gateway to preserving and growing wealth but also an opportunity to actively contribute to a transformative financial ecosystem.

Entry into the **KMP** comes with **qualification criteria** designed to ensure participants actively contribute to the growth and liquidity of the ecosystem before accessing its full range of benefits.

These criteria are built on the principle that **active participation drives collective success**. By meeting one of the following qualifications, you earn your place in the Kinesis ecosystem and gain access to its powerful reward mechanisms.

Pre-Conditions to Mint

Before minting KAU and unlocking the system's rewards, participants must first meet **one** of the following **entry qualification criteria**:

1. Sign Up Ten Individuals

- Introduce and onboard 10 individuals to the Kinesis system.

- These new participants help grow the community, creating a larger, more robust ecosystem.

2. Sign Up Three Businesses

- Onboard three businesses to utilise the Kinesis ecosystem for transactions, payments, or asset management.
- This helps establish a foundation of commercial activity, increasing liquidity and system engagement.

3. Trade \$500,000 on the Kinesis Pro exchange

- Demonstrate active contribution by reaching \$500,000 in cumulative trading volume on the Kinesis Pro exchange.
- This promotes liquidity and trading activity, vital to the system's functionality and growth.

4. Spend \$10,000 in Metalback

- Make a cumulative spend of \$10,000 using Metalback rewards.
- This reinforces system engagement by showcasing the practical value and usability of Kinesis rewards in real-world transactions.

5. Spend \$10,000 Using the Kinesis Virtual Card

- Achieve a cumulative spend of \$10,000 in digital assets via the Kinesis Virtual Card (where available).
- This demonstrates the practicality of Kinesis digital assets in real-world transactions, fostering greater adoption and system utilisation.

6. Own KVTs for More Than One Year

- Demonstrate your commitment to the Kinesis ecosystem by holding KVTs for a period exceeding one year.
- This rewards long-term participants and incentivises holding behaviour, further supporting the ecosystem's growth.

7. Buy 10 KVTs via the Kinesis Exchange

- Purchase 10 KVTs via the Kinesis Exchange (*KVTs must be purchased directly on the Kinesis Exchange, remain in the Kinesis account and not be transferred to external wallets or received as deposits. Only direct purchases qualify.*)
- This ensures participants have a vested interest in the ecosystem's success and underscores their active engagement.

Qualification criteria starts from 00:00 Tuesday 4th March 2025

Why Qualification Matters

These entry criteria ensure that every participant contributes meaningfully to the system's growth before enjoying its benefits. This approach creates a **self-sustaining loop of engagement**, where active contribution drives:

- **Liquidity:** A robust trading ecosystem powered by active participants.
- **Community Growth:** A thriving network of individuals and businesses engaging with Kinesis.
- **System Success:** The reinvestment of activity-driven fees into rewards for all participants.

Unlocking the Benefits

Once you meet one of these qualifications, you gain full access to the KMP, including:

- **KAU Rewards:** Start earning immediately after minting with an additional 2bp profit on each mint cycle.
- **Minting Costs:** All minting fees are refunded weekly.

The qualification process ensures that every participant plays a role in building a transparent, equitable, and thriving ecosystem. By contributing to the system's growth through onboarding new participants or driving activity, you help secure a sound financial foundation for yourself and the broader Kinesis community.

Your journey begins with contribution. Fulfil the entry criteria today and unlock the full potential of the KMP.

First Timer Explainer

The Kinesis platform is designed to be intuitive, even for first-time users. Below is a step-by-step guide to help new participants get started:

Step 1: Create Your Account

- Visit the Kinesis website and sign up for a [new account](#). See [support guide](#).
- Complete the KYC process by uploading the required documents (ID and proof of address). See [support guide](#).
- Once approved, fund your account with fiat currency (e.g., USD, EUR, or GBP). See [support guide](#).

Step 2: Mint Assets

- Navigate to the Mint section on the platform.
- Choose KAU to mint.
- Enter the amount of fiat you wish to convert into digital assets.
- Confirm the transaction and receive minted KAU directly in your account.

Step 3: Earn Yields

- Start earning Minter's Yield (5%) as soon as you mint and transact your assets.
- Use your assets to transact, transfer, or trade within the system to activate Velocity Yield (10%).
- Automatically earn the Holder's Yield on all gold (KAU) held.

Step 4: Spend and Transact

- Order your Kinesis Debit Card to make purchases with digital assets, instantly converted at the point of sale.

Step 5: Track and Grow

- Use the Kinesis dashboard to monitor your earnings from minting and transaction activity.
- Reinvest your earnings to increase returns and contribute further to the ecosystem.

User-Friendly Design and Accessibility

Interactive Dashboard:

- Provides real-time updates on minted assets, yields, and transaction history.

Educational Resources:

- Access tutorials, webinars, and FAQs designed for beginners.

Visual Guides:

- Step-by-step diagrams of the minting, spending, and yield-earning processes make it easy to follow.

The Kinesis Ecosystem: Integrated services and Features

The Kinesis ecosystem is a groundbreaking platform that integrates gold-backed digital assets (**KAU**), silver-backed assets (**KAG**), fiat-compatible tools, and blockchain technology into a single, seamless financial solution. It redefines the way individuals and businesses interact with money, offering a secure, transparent, and versatile framework designed to maximise usability and rewards. Here's an overview of the full Kinesis ecosystem and its innovative components.

1. Kinesis Digital Assets: Gold and Silver-Backed Stability

- **KAU**: Each unit is fully backed by 1 gram of physical gold, offering a secure and stable store of value.
- **KAG**: Each unit is fully backed by 1 troy ounce of physical silver, providing additional portfolio diversification and protection against volatility.
- These assets are stored securely, fully redeemable, and designed to deliver intrinsic value with real-world utility.

2. USD1: The Kinesis Stablecoin

- **USD1** is a fiat-pegged stablecoin, offering a 1:1 value ratio with the US dollar.
- Ideal for price stability in trading and payments, USD1 provides an essential bridge between fiat currencies and digital assets like KAU and KAG.

Benefits:

- Instant conversions between fiat and digital assets.
- Stability for trading and transactions, especially during market fluctuations.
- Simplified integration into business operations for payments and settlements.

3. Kinesis Virtual Card: Spend Anywhere, Anytime

- The Kinesis Virtual Card enables users to spend their digital assets, including **KAU**, **KAG**, and **USD1**, globally.
- It works seamlessly online and at millions of merchants worldwide, bridging the gap between blockchain-based assets and real-world financial needs.

Features:

- Instant conversions from digital assets into local currency at the time of purchase.
- Secure, fast, and globally accepted, making it ideal for online shopping, travel, and day-to-day expenses.
- Real-time tracking and control via the Kinesis dashboard.

4. Kinesis Pay: Revolutionising Payments

- **Kinesis Pay** is a global payment solution allowing businesses to accept payments in **KAU**, **KAG**, and fiat currencies with minimal transaction fees.
- This feature empowers merchants and enterprises to integrate sound money principles into their operations.

Benefits for Businesses:

- Fast and secure settlement on the blockchain.
- Reduced transaction fees compared to traditional payment processors.
- Global reach with the ability to accept multiple currencies seamlessly.

Benefits for Consumers:

- Make purchases using gold- and silver-backed assets.
- Earn **Velocity Yield (10%)** with every transaction, turning payments into wealth-building opportunities.

5. Kinesis Pro exchange:

- The **Kinesis Pro exchange** is a secure and pro trading platform for trading **KAU**, **KAG**, crypto.
- It offers competitive pricing and the ability to capitalise on market opportunities while retaining the stability of gold-and silver-backed digital assets.

Key Features:

- Trade KAU and KAG against 10+ fiat currencies, such as USD, EUR, and GBP.
- Leverage price differences to optimise profits.
- Real-time trading with transparent fees and a focus on user security.

6. Stellar Blockchain Integration: Secure, Fast, and Cost-Effective

- Kinesis utilises the Stellar blockchain to ensure fast, secure, and low-cost transactions for **KAU**, **KAG**, and fiat.
- The blockchain's transparency and immutability enhance trust and security across all financial activities.

Benefits:

- Transfers completed in seconds with transaction fees as low as \$0.01.
- Immutable ledger ensures transparency for users and businesses.
- Ideal for remittances, international transfers, and secure payments.

7. Rewards Built into the Ecosystem

The Kinesis ecosystem is about utility and rewarding participation, every component works to deliver meaningful financial benefits:

- **Minter's Yield (5%):** Monthly rewards for those minting KAU and KAG.
- **Velocity Yield (10%):** Earned by spending, transacting, and using the system, making every action financially rewarding.
- **Holder's Yield (15%):** Long-term incentives for securely holding digital assets.
- **KVTs:** Long-term investors receive 20% of the platform's global transaction fees, creating compounding passive income opportunities.

8. Business Integration: Solutions for Enterprises

Kinesis is designed to meet the needs of businesses looking to optimise operations, reduce costs, and enhance transparency.

Key Business Tools:

- Accept **KAU**, **KAG**, and fiat payments with Kinesis Pay.
- Use **USD1** for stable, cross-border settlements.
- Trade and hedge using the Kinesis Pro exchange.

Example Use Case:

A business uses KAU to pay suppliers internationally, completing the transfer in seconds with low fees. The business simultaneously earns **Velocity Yield**, reducing operational costs while increasing profitability.

Why the Kinesis Ecosystem Is Revolutionary

The Kinesis ecosystem is a comprehensive, user-centric financial platform that delivers unmatched stability, transparency, and rewards. By integrating tools like **USD1**, the **Kinesis Virtual Card**, and **Kinesis Pay**, alongside gold- and silver-backed assets, it creates a seamless bridge between traditional and digital finance.

With every transaction, users benefit from real-world utility, ongoing rewards, and the assurance of sound money principles. Kinesis empowers individuals and businesses to participate in a financial revolution, transforming how wealth is preserved, grown, and utilised globally.

Kinesis Velocity Token (KVT)

Exclusive Benefits for KVT Holders

KVTs provide holders with a rare opportunity to share in the long-term success of the Kinesis ecosystem. With a **capped supply of just 300,000 tokens**, KVTs are designed to grow in value as the system scales, directly benefiting from increasing transaction volumes and minting activity.

Key Benefits for KVT Holders:

- **20% Global Fee Pool:** KVT holders receive a proportional share of 20% of all global transaction fees, distributed monthly.
- **Compounding Passive Income:** As minting activity grows, so do transaction fees, boosting KVT yield distributions over time.
- **Velocity Yield Growth:** Increased minting volumes expand the Velocity Yield Pool, delivering greater rewards to KVT holders.

Positive Impact of Minting on KVTs

The minting structure directly benefits KVT holders by driving transaction volumes and increasing fee generation, creating long-term value:

- **Higher Minting = Higher Returns:** Increased minting activity generates more fees, resulting in greater KVT yield distributions.
- **Shared Success:** Both minters and KVT holders benefit from sustained minting, aligning incentives across the ecosystem.
- **Scalable Growth:** Rising adoption ensures continuous growth in transaction volume, sustaining profitability for KVT holders.

Why KVT is a Game-Changer

- **True Ownership:** KVT holders are directly tied to the success of the Kinesis platform, aligning their interests with its growth.
- **Scarcity and Value:** The **fixed supply of 300,000 tokens** ensures increasing value as adoption and demand grow.
- **Sustainable Ecosystem:** Ongoing minting and network activity fuel continuous growth, delivering monthly yields to KVT holders.

Conclusion

The KMP is an innovative financial model transforming opportunities for individuals and institutions to engage with sound money principles while generating sustainable income. By combining sound money principles through gold and silver-backed digital assets with advanced blockchain technology, Kinesis empowers participants to mint, trade, and spend with unparalleled security, transparency, and profitability.

This system offers fee reimbursements, and multiple revenue streams through Minter's Yield, Velocity Yield, Holder's Yield and exclusive bonuses. The minting reward system, featuring tiered monthly pools and rollover mechanisms,

incentivises both small and large participants while maintaining fairness and scalability. With the added benefits to KVT holders, the system ensures long-term profitability and ecosystem growth.

The comprehensive structure enables minters to benefit from:

- **Calculated profits on minting activities.**
- **Passive income potential** through calculated yields.

Simultaneously, all Kinesis users are poised to gain from increased platform activity and sustained fee generation, reinforcing the symbiotic relationship between minters and the broader ecosystem.

As the system grows, Kinesis creates a global financial framework that benefits each and every participant. It aligns incentives across users, minters, and holders, driving adoption and solidifying Kinesis as a cornerstone of the new monetary era.

The future of sound money is here. Join Kinesis today to become part of this revolutionary financial movement.
